

Year 6 Term 4 What are we learning in each subject this half term?

Maths

In Maths, we will be introducing the children to algebra using 2 step function machines to generate algebraic formulas. We will then move on to our unit on decimals.

Reading

Our reading this term will focus on developing the children's skills in explaining. They will learn to make a point, provide evidence for this and then explain to the reader what this means.

Science

In Science, we will be learning about the circulatory system. We will have a particular focus on the heart and the different parts and their functions. The children will have the opportunity to make 'blood' and to create an experiment around exercise and pulse rate.

Term 4
Our theme is...
Hearts and Minds

English

Our text this term is Running on Empty by S.E.Durrant. This will inspire us to write letters, take part in a debate and write a short story including a flashback.

RE

This term our focus will be on Christianity, in particular explaining how incarnation and salvation fit within it.

Art

To link to our science around the heart, our art sessions will focus on anatomy and sculpture.

PE

In PE, the children will continue their work with Plymouth Argyle in developing their football skills. In our indoor sessions, we will be working on our core stability through balance and developing our personal skills through movement.
