

Year 6 Term 3 What are we learning in each subject this half term?

Maths

In Maths, we will be focusing on calculations involving fractions. We will learn how to divide and multiply a fraction by an integer and a fraction by a fraction. We will also continue to work on our fluency for the 4 operations.

Reading

Our reading texts this term will include Romeo and Juliet and Twelfth Night. The children will use the reading skills of inference and evaluating use of language.

Science

In Science, we will be learning about electricity. The children will conduct an investigation into circuits and how we can increase the brightness of a bulb. They will also learn and use the scientific symbols for the different components of a circuit.

Term 3
Our theme is...
History Heroes

English

Our text this term is Macbeth by William Shakespeare. The children will use point;detail to describe battle scenes. They will also write their own version of the story.

History

In History, we will be learning about a variety of different history heroes and how their actions led to changes in society. We will explore the lives of Nelson Mandella, Florence Nightingale, Emmeline Pankhurst and Rosa Parks.

Art

This term the children will explore the art form of graffiti and how it has been used through history to make political statements and bring about change.

PE

In PE, the children will use the invasion games of 'beanbag raid' and 'dodgeball' to develop their awareness of space and begin to use tactics to attack and defend.
